SUMMARY

Dynamic cybersecurity enthusiast with a strong CS foundation, leadership experience, and a proactive approach to problem-solving. Quick learner, adaptable, and passionate about driving success in fast-paced environments.

EDUCATION

- RGPV – B.Tech - Computer Science with specialization in Cybersecurity (Nov 2022 - Present)
- St. Joseph's Co-Ed School - Higher Secondary (Apr 2021 - Apr 2022)
- St. Joseph's Co-Ed School- Secondary (Apr 2019 - Apr 2020)

SKILLS

- **Programming Languages-** Python, C
- **Technical Skills-** OOPM, Cybersecurity, Data Structures and Algorithms, DBMS
- **Tools-** Framer, Canva, Packet Tracer
- **Non-Technical Skills-** Public Speaking, Attention to detail, Teamwork, Adaptability
- **Languages-** English, Hindi, Urdu

EXPERIENCE

- **Bharat Billion Impact Challenge (BBIC) — Co-founder (Plugged)**
 - Designed and helped develop Plugged, an innovative platform for the gaming industry.
 - Earned the opportunity to pitch the concept at the 13th Entrepreneurship Summit, hosted by Young Indians (YI).
- **The Cybersecurity Club — Head of Networking**
 - Mentored a team of over 10 students. Collaborated with faculty members and industry professionals to guide students and connect academic knowledge with practical, real-world experiences.
- **CII Young Indians YUVA — Road Safety Chair**
 - YI Road Safety- A CII Young Indians initiative that aims at promoting road safety awareness and initiatives among Indian citizens.
- **Orator's Club — Social Media team**
 - Selected for the Orator's Club through competitive rounds of interview, showcased effective collaboration and problem-solving skills to successfully execute various events.

PROJECTS

- **PLUGGED - an eSports management platform user interface and user experience**
 - Co-developed an intuitive user experience and interface for an esports management platform.
- **Snake, Water & Gun game using python**
 - A Python-based CLI game using randomization, loops, and input validation for an interactive user experience. Showcases skills in conditionals, dictionaries, and error handling.
- **Custom Port Scanner**
 - Developed a Python-based port scanner for VAPT in a Linux environment, enabling open port detection and enhancing network security assessment skills.

CERTIFICATIONS

1. Cisco Virtual Internship 
2. Cisco introduction to Cybersecurity 
3. Cisco Cybersecurity Essentials 
4. Cisco Packet Tracer
